Erd for database so far for sprint 3

(to clarify, I did use a sql > erd diagram maker tool for this. It's still accurate.)

```
+---------------------+        +---------------------+
|     UsersList       |        |      Artist         |
+---------------------+        +---------------------+
| PK  UserID          |        |  PK  ArtistID       |
|username (UNQ)       |        |     ArtistName      |
|     realname        |        |     Genre           |
+---------------------+        +---------------------+
        |                          |
        | 1                         | 1
        |                          |
        v                           v
+---------------------+        +---------------------+
|     Playlist        |        |       Song          |
+---------------------+        +---------------------+
| PK  PlaylistID      |        | PK  SongID          |
| FK  UserID          |        |     SongName        |
|     Title           |        |     SongDate        |
|     PlaylistDate    |        | FK  ArtistID        |
+---------------------+        +---------------------+
                                  |
                                  | 1
                                  |
                                  v
                          +---------------------+
                          |       Album         |
                          +---------------------+
                          | PK  AlbumID         |
                          |     AlbumTitle      |
                          |     Genre           |
                          | FK  ArtistID        |
                          +---------------------+
```

User stories Software engineering

Sprint 3

User stories:

1. Taro Chamberlain (tarosworld)
As a user, I want to log in to my account (tarosworld) so I can listen to my favourite song Rockstar by Lisa from Alter Ego album. I want to quickly find and play it.
Acceptance Criteria:

- User can log in with username tarosworld
- Favourite song Rockstar is stored in the system
- Song name appears in artists album

2. Habsa Sharif (habsasworld)
As a user, I want to access my account so I can listen to Nightboat by Duran Duran from Danse Macabre. I want the system to help me find it easily.
Acceptance Criteria:

- User can log in with username habsasworld
- Song Nightboat is linked to the user

3. Sebastian Moreno (sebsworld)
As a user, I want to log in so I can play my favourite song 212 by Azealia Banks from Broke with Expensive Taste. I want it saved so I can access it quickly.
Acceptance Criteria:

- User can log in with username sebsworld
- Song 212 is most listened song
- User can access the song from favourites

4. Debbie Abrahams (debbiesworld)
As a user, I want to use my account to listen to Say So by Doja Cat from Hot Pink.
Acceptance Criteria:

- User can log in with username debbiesworld
- Song appears in the user's playlist

5. Luke Akehurts (lukesworld)
As a user, I want to log in so I can listen to Miniskirt by AOA from Miniskirt. I want it easy to find.
Acceptance Criteria:

- User can log in with username lukesworld
- Song Miniskirt is stored in the system

6. Diane Abbot (dianesworld)
As a user I want my profile and name to be clearly seen in the main page with my playlist a long side it.

- User can see their profile and page in the main page

Meeting Minutes

Date and Time	Saturday 11th April 2026 Time: 16:32
Project Name	SHT group meeting
Meeting Goal	Everyone to know what their assigned task is Up to date on pug templates and routes what information our database will contain
Facilitator	Habsa
Note taker	Sebastian
Attendees	Sebastian Taro Habsa
Roundtable Updates (each group member to contribute)	Everyone in the team to remind themselves basic SQL commands Familiarise themselves with html for pug fonts
Discussion points	everyone agreed on a deadline for when their tasks should be

	finished (Wednesday 15th April) 11:59pm
Actions (list tasks and assign a group member)	- Everyone to edit code and add functions to develop website - Taro post tasks to be done on github - Habsa create merged PDF with everyones work - Sebastian creates User stories - Sebastian + Taro create SQL for database of website - All members to change database in .env to Sheila (otherwise information wont be pulled from database) - Delete “db” file and docker compose up again once Sheila has been made into our default database

Backlog 0 / 5 Estimate: 0
This item hasn't been started
Ready 0 Estimate: 0
This is ready to be picked up
In progress 1 / 3 Estimate: 0
This is actively being worked on
SoftEngCoursework #3
review all lab tasks week 1-5
In review 13 / 5 Estimate: 0
This item is in review
SoftEngCoursework #19
taro to make sql code + sample data for the site
SoftEngCoursework #20
all members to change their individual .env file to make "Sheila" the DB
SoftEngCoursework #16
taro to post tasks on github
SoftEngCoursework #21
make sure that sheila is the proper db, not the original sample one from the scaffolding files
OpSysCoursework #2
activity diagram / flow charts (SEB TASK)
SoftEngCoursework #15
everyone to assist with new code functions & to understand what each part does
SoftEngCoursework #17
habsa to create the final merged pdf for submission
SoftEngCoursework #18
seb to make user stories
OpSysCoursework #5
use case diagram (seb task)
SoftEngCoursework #11
refine our project idea & make it as clear as possible on the pdf
OpSysCoursework #3
designs/colour schemes for the website
Done 20 Estimate: 0
This has been completed
SoftEngCoursework #1
All developers can run the scaffolding code successfully
OpSysCoursework #6
User stories for sprint 3
